

Hello, I'm Shreyas Lalge

Once a coding whiz, now a UX champ. Turning tech complexities into user-friendly simplicity, one design at a time. Let's make tech feel like a Sunday stroll!

Experience

SOFTWARE ENGINEER

Persistent Systems, Pune, Maharashtra, India

Role: UI Frontend Developer

Project 1: Data Module

- Developed a specialized module for a key client in the analytical instruments, life sciences, diagnostics, pharmaceuticals, and biotechnology sector.
- Contributed to the creation of a versatile module displaying comprehensive product information and metadata.
- Implemented functionality allowing users to download metadata in various formats.
- Recognized with a "Bravo" award for outstanding contributions.

Project 2: Customer Service Portal

- Worked on the design and development of multiple modules for the Customer Service Portal.
- Ensured comprehensive customer support through effective module implementation.

Project 3: Learning Management System (Persistent University) – Internal Project

- Led the development of an attractive and responsive user interface for administrators, managers, teachers, and students.
- Successfully transitioned between frontend and backend development tasks to meet project timelines.
- Received appreciation for vital contributions to the successful launch of the Learning Management System

Responsibilities:

- Collaborated seamlessly with cross-functional teams.
- Specialized in high-quality, well-tested code for diverse software projects.
- Worked closely with the design team to craft effective user interfaces.
- Leveraged UI technologies to enhance user experiences and optimize application performance.

PROJECT INTERN

Electronic Relays India Pvt. Ltd., Bangalore, India

Role: Intern, Relay Design

Responsibilities:

- Gained insights into various company departments and processes.
- Actively contributed to the design of a 4-terminal phase angle solid-state relay.
- Collaborated within a team setting, learning from experienced professionals.
- Acquired hands-on experience in relay design and implementation.
